## DESCRIPTION

The Geometric Series is produced of natural clay. The black and white graphics are applied by screening the pattern to the tile by hand. The tile is then fired at a high temperature, making it resistant to moisture absorption and staining. This tile requires no sealing and is significantly easier to install and care for than a cement tile. The colors in this tile will not fade or patina.

## RECOMMENDED USE

- Suitable for all indoor applications.
- Good for wet area, showers and bath.
- Suitable for high temperature areas such as fireplaces, behind ranges and pizza ovens.
- This tile is not frost proof.
- This tile should not be used in pools/fountains.

## TECHNICAL

- Water Absorption: 3% < 7%
- Abrasive Resistance: C3
- Scratch Hardness: MOHS 5
- Coefficient of Friction (COF): C2
- Shade Variation: V3
